## **MAINTENANCE OF WATER BODIES IN THE CAMPUS**

### **Brief report:**

Water is required in the college campus for the following uses:

- Drinking water
- Laboratories
- Toilets
- Gardening

Ground water is pumped into storage tanks located at terrace of the building. Water is distributed through well laid pipe network. For drinking purpose RO water filter fitted on each side of floor. Water for all other purpose is supplied through another set of distribution inlet pipes in other 5 tanks of variable size to full fill other needs of water.

The distribution and circulation of the water is maintained and supervised by civil work. The taps and water storage tanks are checked for leakage and proper functioning periodically / as per the requirement. The leakage of taps, tanks and valves are carefully inspected to avoid water wastage in the college campus.

Waste usage of water is reduced using low pressure flushes. All the stakeholders of the college are well educated to use water economically and efficiently.

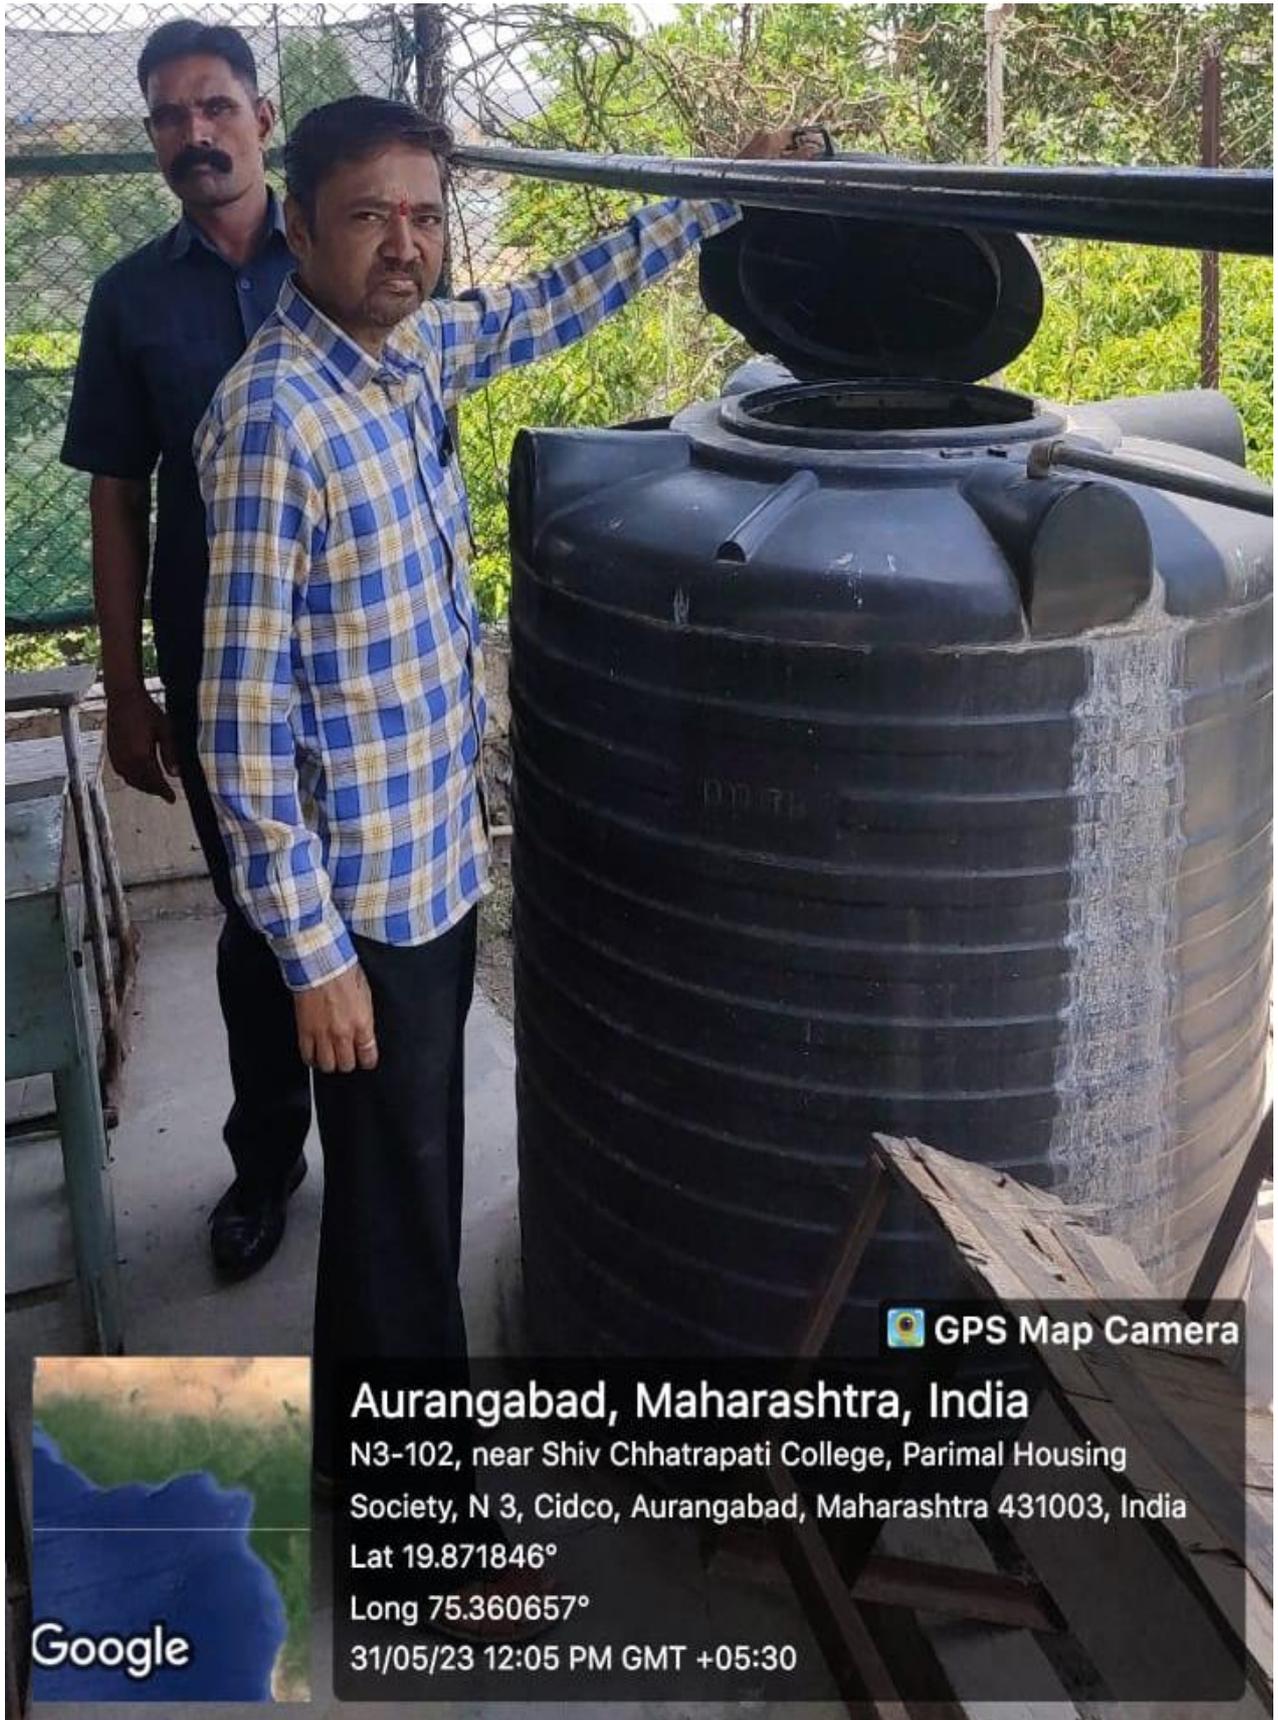

Following measures are adopted for retaining water in the campus contamination free and provide a pure supply of water to all stakeholders in the college campus:

- Regular checking of valves and taps to ensure leakage
- Regular cleaning of RO plants
- Water purification for zero contamination
- Save water awareness in the college campus
- Recycling and reuse of water for gardening purpose
