WATER REUSE IN THE COLLEGE CAMPUS

The practice:

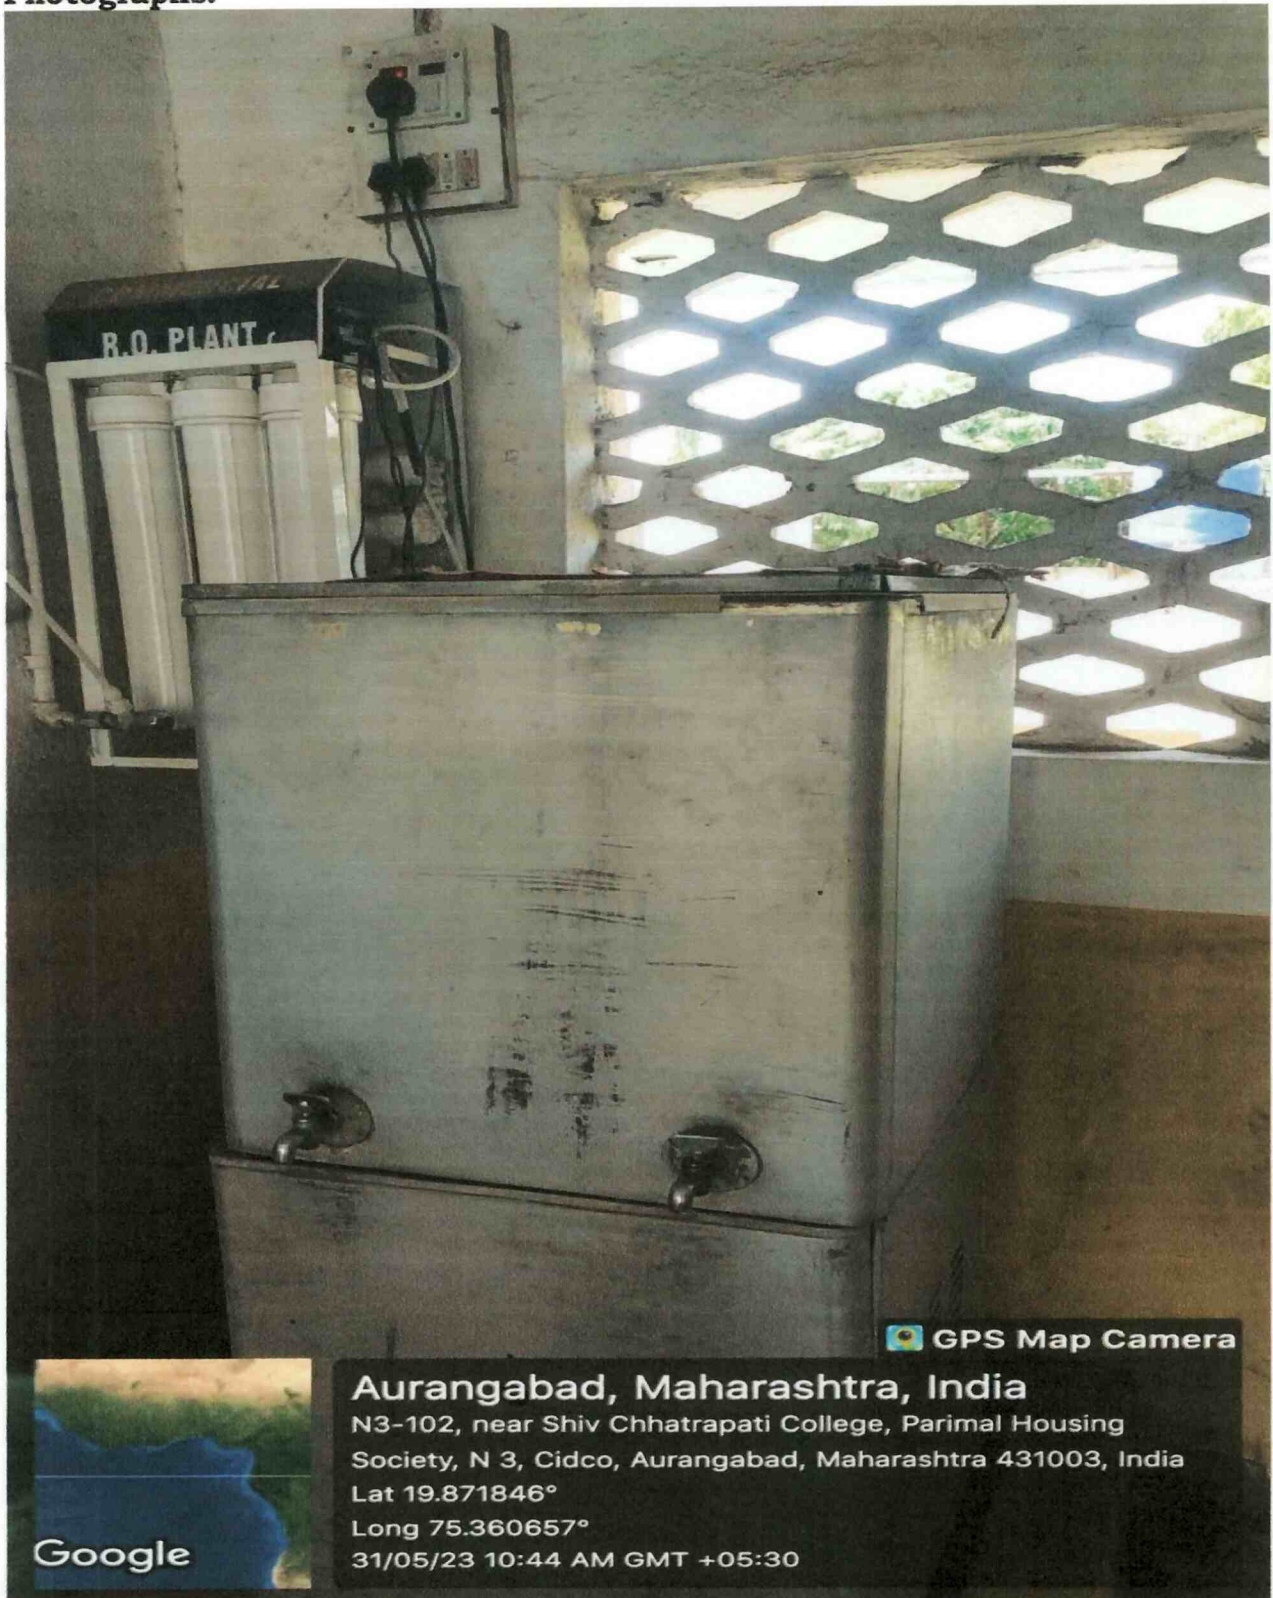

Water is life. It is required for all living plants and animals. However, due to the current situation of scarcity of water in the current era, it is essential to reuse and recycle water.

M. S. P. Mandal's Shivchhatrapati College, Aurangabad works on the 3Rs i.e. reduce, reuse, and recycle. The waste water collected from the water purifiers is properly channelized through pipeline and provided to the plants and trees in the college campus.

Aurangabad

Advantages of water reuse for gardening:

- Saves water
- Save water bill of Municipal corporation
- Helps to create and maintain greenery in the college campus
- Allows to follow the principles of 3Rs
- Follows a clean and environmentally benign institutional initiative.
